## We know insurance and we want to help!

Coverpoint works *exclusively* with insurance companies, which means we understand your line of business. Our team of insurance specialists has the expertise and the experience to tailor our solutions specifically to your needs.

Other IT companies expect you to mould your business operations to fit their model: at Coverpoint, we adapt our online solutions to your business agenda, helping you achieve your goals of efficiency and profitability.

## Coverpoint solutions allow you to conduct your sales process online, eliminating your limitations.

Coverpoint removes **geographical boundaries**, allowing your sales process to flow through Agent Networks in the UK and internationally.

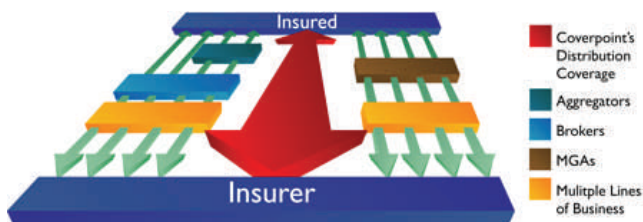

Coverpoint mitigates **time constraints**, giving you control of your rating online. Clients benefit by being able to quote and buy 24/7, subsequently increasing your business volume.

Coverpoint dissolves **allocation differences**, enabling you to streamline your distribution. Our solutions connect your affiliates, agents, and associations onto a single platform, allowing you to move forward with consistency and efficiency.

## Coverpoint gives you control of...

**Your Distribution:** Coverpoint solutions bring you and your partners together onto one platform, streamlining your distribution. Coverpoint allows you to integrate with third parties online, reducing communication time and errors and allowing you to become more efficient and effective.

**Your Policy Administration:** Coverpoint allows you to rate, quote and bind in real time online, speeding up your processing time while reducing any unnecessary paperwork. We allow you to produce your documents online in the form of fully digital files. These digital files are easily modifiable, allowing for quick and effortless midterm adjustments and renewals.

**Your Sales Process:** Coverpoint allows for the rapid implementation of your insurance products online, enabling you to build and add new products quickly and at a low cost. Our online solutions provide multiple solutions for quotes, with or without the use of rating engines.

**Your Market Sector:** At Coverpoint, not only do we expect change, we embrace it! That is why all of our solutions include configurable components, helping you to better adapt to ever-evolving market conditions. Coverpoint provides comprehensive administrative tools that allow users to modify rating rules, add new facilities, documentation, and endorsements quickly and easily. Our components are adaptable to UK markets as well as international markets and include multi-language, multi-country, multi-tax, and multi-currency options.

## Don't forget about the best part!

Coverpoint helps you achieve all this while lowering your costs!

**Reduce your labour costs:** Coverpoint provides you and your team with online solutions that are easily understood, meaning you won't have to waste money on employee training for new software. You will be able to manage your pre-existing products and develop new products online, allowing you to expand your business without expanding your staff.

**Reduce your capital expenses:** Coverpoint mitigates costly manual methods by allowing documentation, processing, and sorting to take place exclusively online, eliminating the expense of unnecessary paperwork. Because Coverpoint works through the backend integration of your pre-existing systems, you will not be required to purchase unnecessary upgrades and software installations.

**Reduce your time wasted:** You can experience all of the benefits of Coverpoint without delay: we are ready and willing to work with you globally, wherever you are located. After you provide us with the necessary information, Coverpoint can have your solutions up and running in only a short time. You will soon see that Coverpoint can shave weeks off your turnaround time, allowing you to focus on what matters most: your relationship with your clients.
